Exam : CompTIA SY0-201

Title : CompTIA Security+ (2008 Edition) Exam

Version : Demo

1. All of the following provide confidentiality protection as part of the underlying protocol EXCEPT:

- A.SSL.
- B.SSH.
- C.L2TP.
- D.IPsec.WBerlin Sans

Answer: C

2. Which of the following allows an attacker to manipulate files by using the least significant bit(s) to secretly embed data?

- A.Steganography
- B.Worm
- C.Trojan horse
- D.VirusWBerlin Sans

Answer: A

3. Which of the following type of attacks would allow an attacker to capture HTTP requests and send back a spoofed page?

- A.Teardrop
- B.TCP/IP hijacking
- C.Phishing
- D.Replay WBerlin Sans

Answer: B

4. How should a company test the integrity of its backup data?

- A.By conducting another backup
- B.By using software to recover deleted files
- C.By restoring part of the backup
- D.By reviewing the written proceduresWBerlin Sans

Answer: C

5. Which of following can BEST be used to determine the topology of a network and discover unknown devices?

- A.Vulnerability scanner
- B.NIPS
- C.Protocol analyzer
- D.Network mapper

Answer: D

6. When should a technician perform penetration testing?

- A.When the technician suspects that weak passwords exist on the network
- B.When the technician is trying to guess passwords on a network
- C.When the technician has permission from the owner of the network
- D.When the technician is war driving and trying to gain access

Answer: C

7. An administrator has implemented a new SMTP service on a server. A public IP address translates to the internal SMTP server. The administrator notices many sessions to the server, and gets notification that the servers public IP address is now reported in a spam real-time block list. Which of the following is wrong with the server?

- A.SMTP open relaying is enabled.
- B.It does not have a spam filter.
- C.The amount of sessions needs to be limited.
- D.The public IP address is incorrect.

Answer: A

8. Which of the following is MOST efficient for encrypting large amounts of data?

- A.Hashing algorithms
- B.Symmetric key algorithms
- C.Asymmetric key algorithms
- D.ECC algorithms

Answer: B

9. Which of the following is a reason why a company should disable the SSID broadcast of the wireless access points?

- A. Rogue access points
- B. War driving
- C. Weak encryption
- D. Session hijacking

Answer: B

10. Which of the following BEST describes ARP?

- A. Discovering the IP address of a device from the MAC address
- B. Discovering the IP address of a device from the DNS name
- C. Discovering the MAC address of a device from the IP address
- D. Discovering the DNS name of a device from the IP address

Answer: C

11. Which of the following would be BEST to use to apply corporate security settings to a device?

- A. A security patch
- B. A security hotfix
- C. An OS service pack
- D. A security template

Answer: D

12. A small call center business decided to install an email system to facilitate communications in the office. As part of the upgrade the vendor offered to supply anti-malware software for a cost of \$5,000 per year. The IT manager read there was a 90% chance each year that workstations would be compromised if not adequately protected. If workstations are compromised it will take three hours to restore services for the 30 staff. Staff members in the call center are paid \$90 per hour. If the anti-malware software is purchased, which of the following is the expected net savings?

- A. \$900
- B. \$2,290
- C. \$2,700
- D. \$5,000

Answer: B

13. Which of the following is the main objective of steganography?

- A.Message digest
- B.Encrypt information
- C.Hide information
- D.Data integrity

Answer: C

14. Which of the following would allow for secure key exchange over an unsecured network without a pre-shared key?

- A.3DES
- B.AES
- C.DH-ECC
- D.MD5

Answer: C

15. Which of the following improves security in a wireless system?

- A.IP spoofing
- B.MAC filtering
- C.SSID spoofing
- D.Closed network

Answer: B

16. A user wants to implement secure LDAP on the network. Which of the following port numbers secure LDAP use by default?

- A.53
- B.389
- C.443
- D.636

Answer: D

17. On which of the following is a security technician MOST likely to find usernames?

- A.DNS logs

- B.Application logs
- C.Firewall logs
- D.DHCP logs

Answer: B

18. How many keys are utilized with asymmetric cryptography?

- A.One
- B.Two
- C.Five
- D.Seven

Answer: B

19. During a risk assessment it is discovered that only one system administrator is assigned several tasks critical to continuity of operations. It is recommended to cross train other system administrators to perform these tasks and mitigate which of the following risks?

- A.DDoS
- B.Privilege escalation
- C.Disclosure of PII
- D.Single point of failure

Answer: D

20. Which of the following network filtering devices will rely on signature updates to be effective?

- A.Proxy server
- B.Firewall
- C.NIDS
- D.Honeynet

Answer: C

21. Which of the following is a single server that is setup in the DMZ or outer perimeter in order to distract attackers?

- A.Honeynet
- B.DMZ

C.Honeypot

D.VLANWBerlin Sans

Answer: C

22. Which of the following encryption algorithms is decrypted in the LEAST amount of time?

A.RSA

B.AES

C.3DES

D.L2TPWBerlin Sans

Answer: B

23. An administrator is trying to secure a network from threats originating outside the network. Which of the following devices provides protection for the DMZ from attacks launched from the Internet?

A.Antivirus

B.Content filter

C.Firewall

D.Proxy serverWBerlin Sans

Answer: C

24. Which of the following is a way to manage operating system updates?

A.Service pack management

B.Patch application

C.Hotfix management

D.Change managementWBerlin Sans

Answer: D

25. Which of the following is a list of discrete entries that are known to be benign?

A.Whitelist

B.Signature

C.Blacklist

D.ACLWBerlin Sans

Answer: A

26. Which of the following increases the collision resistance of a hash?

- A.Salt
- B.Increase the input length
- C.Rainbow Table
- D.Larger key space

Answer: A

27. A programmer has decided to alter the server variable in the coding of an authentication function for a proprietary sales application. Before implementing the new routine on the production application server, which of the following processes should be followed?

- A.Change management
- B.Secure disposal
- C.Password complexity
- D.Chain of custody

Answer: A

28. When deploying 50 new workstations on the network, which of following should be completed FIRST?

- A.Install a word processor.
- B.Run the latest spyware.
- C.Apply the baseline configuration.
- D.Run OS updates.

Answer: C

29. Which of the following should be implemented to have all workstations and servers isolated in their own broadcast domains?

- A.VLANs
- B.NAT
- C.Access lists
- D.Intranet

Answer: A

30. End users are complaining about receiving a lot of email from online vendors and pharmacies. Which of the following is this an example of?

A. Trojan

B. Spam

C. Phishing

D. DNS poisoning

Answer: B

TEST KING

#1 in IT Testing & Certification Tools

Testking.org is the product of over six years of dedicated hard work and certification achievements. Having learned the hard way to learn IT Exam material and developing excellent tools for achieving, not an easy way, but a smart way to achieve certification success in any field.

Developed for Administrators and Engineers by Administrators and Engineers in the daily grind. Fellow technology gurus have pulled together to make the single best location online to find your practice exams and to study for your next test, whether it be [Microsoft](#), [Cisco](#), [Oracle](#), [HP](#), [IBM](#) or any other industry standard technology.

Our success is built on the success of those who have gone before you. Testking.org continued success is the result of phenomenal word-of-mouth and friendly referrals. It is our famous study guides and prep labs that will grab your attention - but all roads lead to the Testking.org practice exams and Questions and Answers - the ultimate training resource.

Testking.org is built on the core knowledge from our technical training staff and through community and the natural infrastructure of social networking.
